

SPECIAL VEHICLES

FUNCTION FLAWLESSLY UNDER THE MOST DIFFICULT CONDITIONS

DOMETIC IS YOUR IDEAL PARTNER

FOR NUMEROUS APPLICATIONS FOR SPECIAL VEHICLES, WHETHER IT CONCERNS
COMFORT ON THE ROAD OR ON-SITE FACILITIES.

Safety and comfortable conditions are hugely important in work vehicles. Safety as well for the employees as for the wider public. It doesn't matter if you drive a fire or garbage truck, a crane or an ambulance. Dometic offers several solutions for mobile or on-site power supply, ranging from a single power unit to a complex battery-based power system. Air conditioning, cooling boxes and

even complete integrated temperature controlled solutions for vans. For safety solutions you can think at rear-view cameras to so-called "bird view" cameras which capture the entire 360° area around the vehicle or active systems such as parking sensors. And that's just a small selection of the possibilities.

FIRE TRUCKS

Emergency service vehicles such as fire trucks need to perform flawlessly under the most difficult conditions. That is also true of the people who work with them. Dometic offers a wide range of vehicle-specific products to provide support for these extreme, often complex, tasks.

AMBULANCES

For emergency service vehicles such as ambulances precision and time matter. They need to perform flawlessly under the most difficult situations. In an ambulance, the crew need highly reliable, controlled cooling facilities for storage of medication. Dometic offers a wide range of professional cooling solutions and vehicle-specific products to provide support for these extreme, often complex, tasks.

BODYWORK MANUFACTURING

Truck and trailer body builders design and build vehicles for all kinds of applications: from furnishing a small delivery van, to building a long vehicle for cargo transport or mobile exhibition vehicle. Professional body builders are creative and inventive and so it helps to work with suppliers who operate in the same way. Dometic is the ideal partner for numerous applications, whether it concerns comfort on the road or on-site facilities.

- Dometic CFF compressor cooler

DOMETIC FRIGO

Operation performance according to ATP regulations with 3 door openings per hour at 30 °C outside temperature.

INFO

The Dometic Frigo control unit displays when service is due. The cooling system will keep running, though. The calculation of the operating hours is based on the time the compressor is in operation. Service is due after the first 100 operating hours after the cooling system's initial start-up, and then every 1,000 operating hours.

HORSE TRANSPORT

Trucks provide safe transportation for people and animals (or machines). Special vehicles can also house them, we encounter these vehicles in equestrian sport, and also in the world of car and motor racing, cycling and skating. In most cases, these vehicles are customized by specialized companies with carefully chosen suppliers. After all, the quality of the products used also affects the quality of the entire vehicle.

MOBILE SHOPS AND FOOD TRUCKS

From trade events to markets in towns and city centres, we see vehicles being used everywhere for the promotion, demonstration and sale of products. Often they take the form of a mobile shops, selling bread, fish and candy, to name just a few or even the most delicious food and drinks to enjoy with friends and family.
