AIRCON PARTS

ORIGINAL QUALITY REPLACEMENT PARTS
ENGINEERED IN GERMANY

MANUFACTURER QUALITY | PERFECT FIT | FOR QUICK REPAIRS
LARGE MARKET COVERAGE | BRAND NEW PARTS ONLY

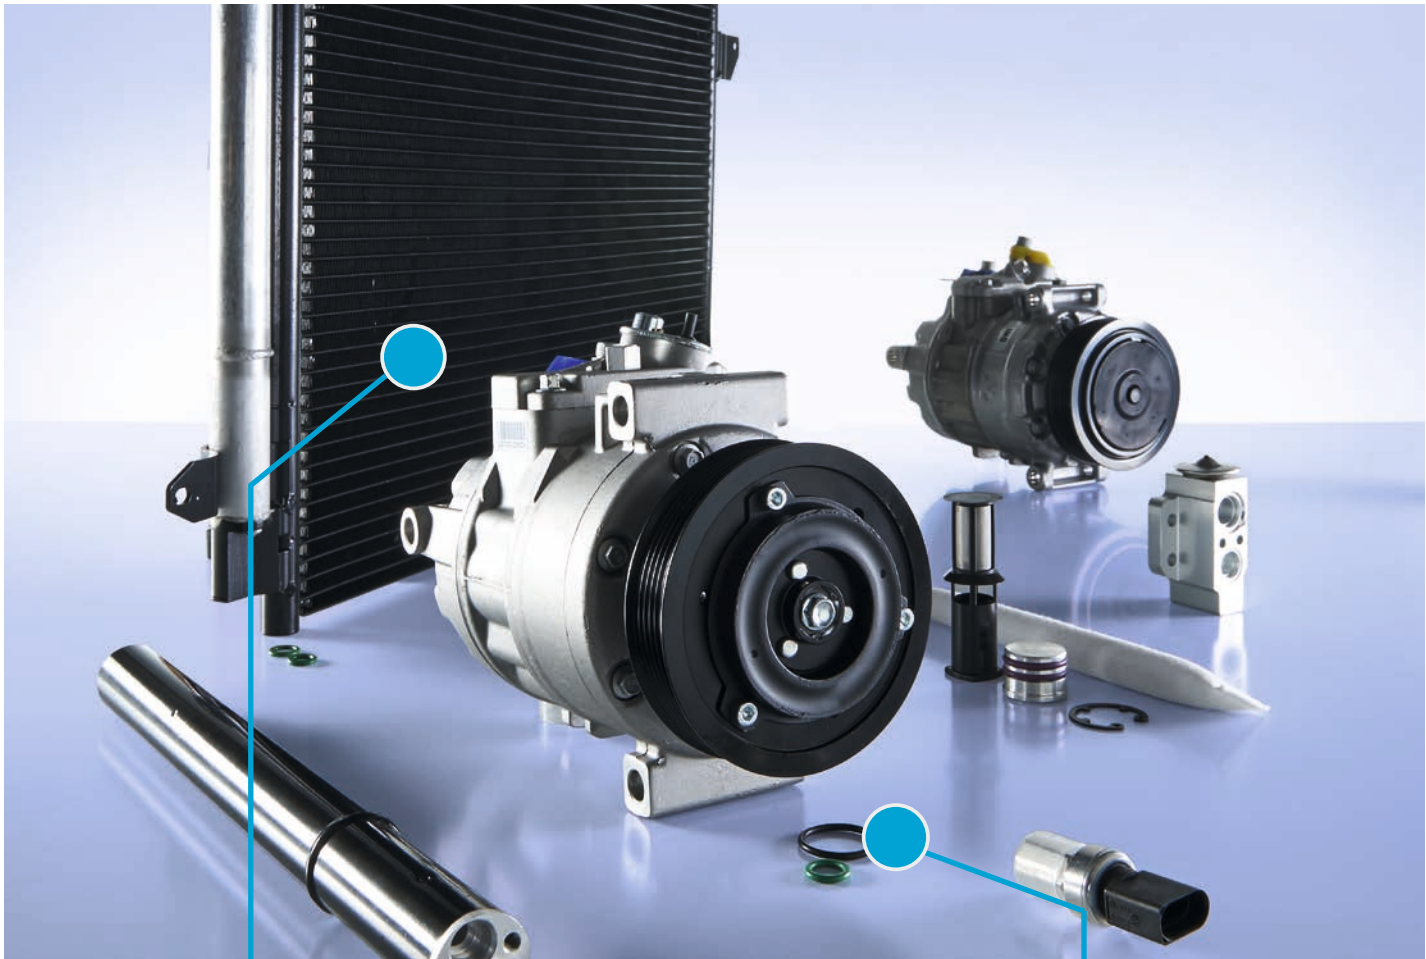

WAECO AIRCON PARTS – YOUR NATURAL CHOICE FOR A/C PARTS

The development and management of the WAECO AirCon Parts range is in the hands of experienced WAECO specialists who maintain excellent contacts within the automotive industry and all leading trade associations. Thanks to the accurate work of our engineers and the careful manufacturing by hand-picked, long-term production partners, you can rest assured that each part fits like a glove and is a delight to install.

We're 100% convinced you will be delighted with our high quality products. All products in the WAECO AirCon Parts range are

tested on a regular basis by recognised independent institutes – scoring excellent results in the tests! In the unlikely event of defects we will refund the material and the labour costs according to the commonly used labour rates.

WAECO is Tecdoc certified data supplier, the Tecdoc links to our products are being updated monthly. Our assortment offers large market coverage! Not to forget: All WAECO AirCon Parts are brand new (no recycled or remanufactured parts).

BLACK COATING – THE PERFECT SURFACE FINISH

Our condensers feature a black paint coating, protecting the sensitive condenser fins from damage by corrosion or smaller stone chips (and thus extends the lifetime of the component) helping to avoid warranty discussions.

“READY TO FIT” – FOR FAST AND EFFICIENT A/C REPAIRS

“Ready to fit” protects you from costly damage resulting from the use of wrong or old O-rings. The “ready to fit” range currently comprises of about 170 items and is continuously updated as required. O-rings have been included in the kits since 2006 – now immediately recognisable by the “ready to fit” symbol.

WAECO AIRCON PARTS – OUR PERFORMANCE, YOUR ADDED VALUE

- Over 40 years of experience in A/C service & AirCon parts
- Product management and development in Germany
- More than 70,000 vehicle applications
- Continuous portfolio management results in many first-to-market products
- 100% quality and accuracy of fit

- Product quality according to Commission Regulation (EU) No. 461/2010
- Product inspection by independent testing institutes (e.g. TWK Karlsruhe)
- Technical hotline service, free of charge
- Training courses: hands-on and clear

WAECO's high-quality range of original replacement A/C parts includes over 950 items for more than 70,000 different vehicle applications. Besides compressors, condensers and driers, we

also provide you with a range of pressure switches, O-rings and expansion valves required for successful repairs on A/C systems.

NEW TO THE RANGE: WAECO E-COMPRESSORS

Service work on the A/C systems of electric or hybrid vehicles is steadily increasing. This new vehicle generation requires a special, high-voltage A/C compressor. WAECO has anticipated the rising demand and as a result, the WAECO AirCon Parts range now also includes high-voltage E-compressors. And workshops can be sure that the quality and accuracy of fit perfectly matches the original part.

QUALITY YOU CAN RELY ON

We maintain our own test lab, cooperate with specialised manufacturers and perform comprehensive tests to make sure that WAECO AirCon parts are just as easy to install as the original they replace.

PRECISION FOR YOUR PEACE OF MIND

WAECO AirCon Parts are tested by independent institutes (e.g. TWK Karlsruhe) – with outstanding results. The high quality level is also documented by compliance with Commission Regulation (EU) No. 461/2010.

ALWAYS FACTORY-NEW

WAECO AirCon Parts are neither recycled nor remanufactured, but always factory-new.

MORE THAN JUST PARTS! A CONSISTENT OVERALL CONCEPT

HUMIDITY FREE STORAGE AND FEEDING SYSTEM FOR FRESH OIL AND UV ADDITIVE

We consistently think our offer through to the end, therefore we also offer the matching original compressor oils. Since completely moisture-free storage is of great importance for compressor oils, we offer the original oils in our special moisture-free professional oil system (special laminate pouch in can). This way you can be sure that you are always working with the right compressor oil and at a high technical level.

Good to know: Moisture in the A/C circuit can lead to acid formation. This is particularly dangerous with electric compressors, as the acid can decompose the plastic sheathing of the wires we find in E-compressors. By using the right oil for the A/C compressor and making sure that the oil is free of humidity, you will minimise such risks.

- 1 Special connection**
- 2 Opening in the metal casing**
to balance the pressure
- 3 Laminated bag**
with double-layer aluminium laminate
